

Rezon Halos® Sizing Guide

Rezon Halos® Size Guarantee

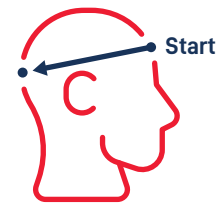

Halos® is designed to reduce your brain injury risk, so it must fit correctly.

If in doubt, or on a sizing border, **size down to the smaller option**. Rezon Halos® should fit tightly.

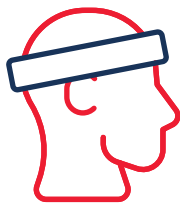

If Halos® moves while wearing, it is too large!
And Halos® should never obstruct your view.

If you feel any tension or end up with deep red marks on your forehead, pick the next size up!

If your Halos® does not fit, let us know and send it back – we will correct the sizing and resend.

Start at the centre of your forehead.

How Halos® should be worn.

Step-by-Step Instructions

1. Print at 100% scale

Make sure your printer settings are set to "Actual Size" or "100%". Do not scale to fit the page. Check size using a credit/debit card, it should fit within the red dotted line above.

2. Cut out your measuring tape.

3. Find the centre of your forehead

Locate the midpoint of your forehead, just above your eyebrows.

4. Place the centre mark on your forehead

Hold the "START" mark of the printed tape measure at the centre of your forehead.

5. Wrap to the centre of the back of your head

Pull the tape straight around the side of your head to the **centre of the back of your head** (the point directly opposite your forehead at the top of your spine). The tape should run behind your ear. Halos® can be worn above or over the ears, but measurement should be taken against the surface of your head.

6. Read your measurement, ask someone to help you

Note the size shown on the tape when it reaches the back of your head. This is your Halos® Size.

Measure	Size
25-26cm	XXXS
26-27cm	XXS
27-28cm	XS
28-29cm	S
